DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 3-5, 7-14, 16-19, and 21-25 are allowed. The following is an examiner's statement of reasons for allowance: the prior art fails to teach or fairly suggest the claimed invention.
2. Specifically, no teaching or obvious suggestion was found of the limitation "a defect repair system that repairs defects in a substrate via application of a first voltage to the substrate and a second voltage to the scribing up, which is positioned at a location determined by the scanning probe microscope; wherein defect location(s) and the substrate itself are mapped into a grid, each portion of which corresponds to an XY position" as in claims 1 and 14. Applicant's argument received on 9-30-04 is persuasive because neither Li et al nor Kuroda et al teach defect identification as recited.
3. Likewise, no teaching or obvious suggestion was found of the limitation " a scanning probe microscope that has a measuring tip and a scribing tip... means for applying a first biasing voltage to the semiconductor substrate and a second biasing voltage to the scribing tip;

and means for mapping the semiconductor substrate and defect locations thereon in a grid pattern” as in claim 13.

4. Claims 3-5,7-12,16-19, and 21-25 are allowed by virtue of their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
